SOFT SKILLS

- Complex Problem Solving
- Rapid Technology Adoption
- Technical Documentation
- Agile Team Collaboration

KEY ACHIEVEMENTS

- 12+ Full-Stack Projects Built
- 146+ GitHub Commits (2024-25)
- 6+ Technical Videos Produced

TECHNICAL SKILLS

Languages

JavaScript, C, C++

Frontend

HTML, CSS, React, Tailwind CSS, GSAP, Framer Motion, Three.js

Backend

Node.js, Express.js, REST APIs

Database

MongoDB

TOOLS

Git, GitHub, Vite, Postman, EmailJS, VS Code, Vercel, Netlify

LEARNING & INTERESTS

- Backend Skills & Scalable APIs
- Immersive Web Animations (GSAP, Three.js)

PROFESSIONAL SUMMARY

I am a highly motivated Full Stack Web Developer and a 2nd-semester Computer Science student with a profound passion for engineering modern, high-performance, and visually stunning web applications. Specializing in the MERN Stack, GSAP, and Three.js, I bridge the gap between complex backend logic and immersive frontend experiences. My development philosophy centers on writing clean, scalable code and implementing data-driven architectures. I am committed to continuous learning and actively contribute to the developer community through technical content creation and collaborative open-source projects. I am currently seeking to leverage my technical expertise in an innovative, fast-paced engineering environment.

PROJECTS

FleetFlow Dashboard

[🔗 Live Project](#)[🐙 View GitHub](#)

- **System Architecture:** Architected a modern, data-driven fleet management dashboard with real-time analytics and interactive visualizations.
- **Tech Stack:** Implemented using **React.js**, **Tailwind CSS**, and **Chart.js** for dynamic data representation.
- **Analytics:** Integrated complex charting mechanisms to provide predictive insights and fleet performance metrics.

Eufy Security Clone

[🔗 Live Project](#)[🐙 View GitHub](#)

- **Pixel-Perfect Logic:** Engineered a fully responsive clone of the Eufy e-commerce platform, demonstrating strong proficiency in advanced CSS layouts.
- **Modern Design:** Implemented sophisticated UI components using **HTML5** and **CSS3**, focusing on mobile-first responsiveness.
- **Optimization:** Optimized asset loading and grid layouts for seamless user experience across all devices.

Moglix Platform Clone

[🔗 Live Project](#)[🐙 View GitHub](#)

- **Scalable Architecture:** Developed a structural clone of the Moglix industrial e-commerce site, focusing on complex navigation systems and product cataloging.
- **Layout Design:** Built advanced product grids and category filters using **HTML5** and **CSS3**.
