

SKILLS

Languages & Frameworks

JavaScript (ES6+), TypeScript, C++, C, React.js, Node.js, Tailwind CSS, HTML5, CSS3

Databases & Backend

MongoDB, Supabase, REST APIs, Express.js

Cloud & DevOps

AWS, Google Cloud, Firebase, Vercel, Netlify, GitHub Actions, Git, GitHub, Render

Tools & Platforms

Postman, Figma, Notion, VS Code, npm, Docker

Specialized

MERN Stack, GSAP Animations, Three.js 3D Engineering

HACKATHONS & AWARDS

1. Participant — ArtPark CodeForge

Prototype Development Round | 2026
IISc Bangalore

Participated as **Team Code Blooder** in the Build & Submit Prototype Development Round at the Indian Institute of Science, Bangalore. Focused on AI-driven solution implementations.

[Certificate](#)

2. Participant — ElectroSphere DM 2K26

Software Edition | January 2026
Swaminarayan University

Successful participation in ElectroSphere DM 2K26 as **Team Fraud Hunters**, developing innovative utility software solutions bridging traditional business requirements with modern stacks.

[Certificate](#)

EDUCATION

Swaminarayan University, Kalol 2025 – 2029

Bachelor of Engineering (BE) in Computer Science
Expected Graduation: 2029

Adarsh Vidhya Mandir, Sirohi, Rajasthan 2024 – 2025

Higher Secondary Education (12th Board)
Rajasthan Board of Secondary Education (RBSE)

INTERESTS & STRENGTHS

- Passionate about building modern, responsive, and performance-driven web applications
- Strong problem-solving mindset and focused on improving backend skills and scalable APIs
- Enjoy crafting immersive digital experiences using tools like GSAP and Three.js
- Believe great software is built directly at the intersection of clean, modular code and thoughtful design
- Goal is to relentlessly keep learning, actively contribute to meaningful projects, and collaboratively grow

EXPERTISE & SUMMARY

- Full Stack Web Developer currently in 2nd-semester building highly modern dynamic web applications
- Specialized heavily in the robust **MERN Stack (MongoDB, Express, React, Node.js)** ecosystem
- Architected projects spanning active event management, live fleet flow tracking, and Pinterest-inspired platforms
- Competed in the esteemed **Appian AI Application Challenge** (IIT Madras) and collaboratively designed solutions in the **FinAgent Hackathon** (IIT Bombay) sprints
- Completed the Anthropic "Claude Code in Action" course to deeply leverage emergent AI development workflows seamlessly

CERTIFICATIONS

1. [Appian AI Challenge](#) (IIT M)

2. [ArtPark CodeForge](#) (IISc)

3. [FinAgent Hackathon](#) (IIT B)

4. [ElectroSphere DM 2K26](#)

5. [Claude Code in Action](#)

EXPERIENCE

Full-Stack Developer & Web Engineer

2025 – Present | Freelance / Personal Projects

- Engineered end-to-end full-stack web architectures smoothly utilizing React.js, Node.js, Express.js & MongoDB frameworks
- Developed strongly scalable RESTful API endpoints and globally deployed live applications natively on Vercel, Render & Google Cloud Platform
- Skillfully integrated primary third-party services actively including Supabase auth solutions, structured Cloudinary media hosting, and flexible Firebase databases
- Reliably delivered optimized production-grade software platform solutions actively operating under strict intensive hackathon sprint environments safely

PROJECTS

1. Eventhub

[Live](#) [Github](#)

React.js · Node.js · Express.js · MongoDB

Comprehensive event management platform featuring real-time booking and interactive dashboards with a scalable backend architecture optimized to handle complex simultaneous user events securely.

2. Fleet-Flow

[Live](#) [Github](#)

React.js · CSS3 · Logistics Tracker

Intuitive fleet management and unified logistics solution helping businesses optimize live vehicle tracking metrics and coordinate routing paths effectively.

3. PinIndia

[Live](#) [Github](#)

React.js · Supabase · Tailwind CSS · Vercel

Pinterest-inspired visual discovery platform for Indian content creators featuring a high-performance masonry grid layout and dynamic backend integrations.

4. Clone Website

[Live](#) [Github](#)

HTML5 · CSS3 · JavaScript · GSAP Animations

Pixel-perfect and deeply responsive product landing website clone showcasing advanced CSS layouts and custom multi-step GSAP scroll-based fluid animations.
